Professor Daniel J. Rudolph
American Mathematical Society
Department of Mathematics
University of Maryland
College Park, MD 20742, U.S.A.

Dear Professor Rudolph,

I am submitting the final (revised) version of the article entitled *An extension of Lomonosov's Techniques to non-compact Operators* for publication in the Transactions of the American Mathematical Society.

The manuscript has been prepared using AMS- $\text{\LaTeX} 2_{\epsilon}$ and the source file has been e-mailed to: PUB-SUBMIT@MATH.AMS.ORG

I fixed a few typing mistakes and a couple of small inconsistencies that escaped referee's attention. Other than a few minor changes described in an e-mail the paper remains the same.

Once again, thank you for your assistance with electronic submission.

Sincerely yours,

Aleksander Simonič
