

HEAT AND THERMODYNAMICS

Chapter 1. Introductory Remarks

- 1.1 Introduction
- 1.2 Caloric, Calories, Heat and Energy
- 1.3 Extensive and Intensive Quantities
- 1.4 Mole
- 1.5 Prepositions
- 1.6 Applicability of Equations

Chapter 2. Partial Derivatives

- 2.1 Introduction
- 2.2 Partial Derivatives
- 2.3 Implicit Differentiation
- 2.4 Product of Three Partial Derivatives
- 2.5 Second Derivatives and Exact Differentials
- 2.6 Dee and Delta

Chapter 3. Temperature

- 3.1 Introduction
- 3.2 Zeroth Law of Thermodynamics
- 3.3 Temperature Scales (1)
- 3.4 Temperature Scales (2)
- 3.5 Exercises

Chapter 4. Thermal Conduction

- 4.1 Introduction
- 4.2 Thermal Conductivity
- 4.3 The Heat Conduction Equation
- 4.4 A Solution of the Heat Conduction Equation

Chapter 5. Thermodynamic Processes

Chapter 6. Properties of Gases

- 6.1 The Ideal Gas Equation
- 6.2 Real Gases
- 6.3 Van der Waals and Other Gases
- 6.4 Gas, Vapour, Liquid and Solid
- 6.5 Kinetic Theory of Gases: Pressure
- 6.6 Collisions
- 6.7 Distribution of Speeds
